real-time ship tracking with vesseltracker.com

YOUR LEADING AIS PROVIDER

About Us

vesseltracker.com has been providing real-time vessel movements from all corners of the globe since 2006, reporting on over 120,000 vessels a day, from five continents and in over 800 ports.

We are one of only a few providers that can offer terrestrial and satellite AIS data combined.

Our vesseldatabase covers the world merchants fleet and our portdatabase knows almost every port in the world.

Our services are customised to suite the challenges of day to day operations of companies who need a clear picture of local and worldwide ship traffic.

There is no other AIS provider who can provide you such a dedicated and customisable solution for all your ship reporting requirements.

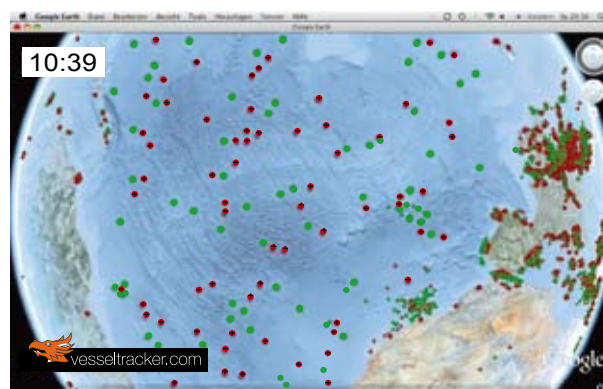

AIS Antenna Coverage

Our AIS Antenna Network is a dynamic growing network with more than 500 AIS antenna stations that cover more than 800 ports.

AIS Satellite Coverage

vesseltracker.com works together with a few AIS satellite provider that collect AIS data in space. In combination with AIS terrestrial data this gives you a clear picture about the worldwide fleet movements.
